

PROJECT-BASED LEARNING INCUBATOR

Are you looking to expand your technical teaching skills and incorporate cybersecurity into your curriculum?

Join us for an unforgettable 3-day learning experience at the **University of Colorado Colorado Springs on July 18-20** or at **Moraine Valley Community College on August 3-5**.

WHO IS THIS FOR?

The Learning Incubator is specifically designed for technical teachers and educators from high schools and community colleges who want to promote cybersecurity in multiple disciplines, such as healthcare, automotive technologies, manufacturing, process control, transportation, critical infrastructure, modern agriculture, electronics, communications, banking and finance, and education.

ABOUT THE INCUBATOR

You will participate in various workshops and activities that will teach you design principles, troubleshooting, programming, cybersecurity threat analysis, and critical thinking. You'll also learn how to leverage new and evolving technologies in the classroom, develop new materials including lesson plans, animations, simulations, assessment instruments, and instructional materials, and contribute to the development of a new curriculum.

This incubator also provides a team-based approach to curriculum development and encourages networking and collaboration among your fellow peers. You will have the opportunity to share your experiences, exchange ideas, and work together to create innovative solutions for incorporating cybersecurity into your curriculum.

PARTICIPATION

Participation in the incubator is limited to 36 attendees, so make sure to apply by June 30th to secure your spot! All participants will receive travel funding (\$800.00) and a scholarship (\$1200) for attending. Attendees will also receive a portable lab kit.

Don't miss this chance to enhance your teaching skills and incorporate cybersecurity into your curriculum! Apply now to join us at the 3-day Learning Incubator.
