

# Cybersecurity Law

5/22 – 6/18 Asynchronous    7/17 In person at UCCS

Along with physical, technical, and administrative safeguards, **cybersecurity law is an increasingly important tool** that society relies on to help safeguard digital information. A course on cybersecurity law can be an **important supplement to your technical cybersecurity courses**.

*What's the best way to introduce cybersecurity law to students?* This four -week workshop will provide a **strong foundation for introducing cybersecurity law to students of all backgrounds**—technical and non-technical. We will explore topics such as the nature of the United States legal system, different types of laws that enhance cybersecurity, and specific cybersecurity-related laws such as the Computer Fraud and Abuse Act, data breach laws, and industry-specific laws such as HIPAA. This workshop will also focus on the Fourth Amendment, the Electronic Data Protection Act, and the Fifth Amendment.

Participants will receive **sample syllabi** options with **textbook suggestions, supplemental reading materials** and ideas, **sample slide decks, test questions, assignments**, and a host of ideas for teaching cybersecurity law. This course will emphasize that cybersecurity law is an **important, interesting, and exciting** part of today's cybersecurity landscape and will help you make this topic exciting, relevant, and accessible for all students. **Participants will receive 4 CEU's for this workshop.**
